## AMENDMENTS TO THE CLAIMS

A detailed listing of all claims that are, or were, in the present application, irrespective of whether the claim(s) remains under examination in the application are presented below. The claims are presented in ascending order and each includes one status identifier. Those claims not cancelled or withdrawn but amended by the current amendment utilize the following notations for amendment: 1. deleted matter is shown by strikethrough for six or more characters and double brackets for five or less characters; and 2. added matter is shown by underlining.

1. (Currently Amended) A collection of particles comprising a crystalline composition with a phosphate anion and a lithium cation, the collection of particles having an average particle size less than about 1000 nm.

- (Original) The collection of particles of claim 1 having an average particle size from
  nm to about 250 nm.
- (Original) The collection of particles of claim 1 having an average particle size from
  nm to about 100 nm.
- 4. (Original) The collection of particles of claim 1 having a plurality of metals in the composition.
- 5. (Canceled)

- 6. (Original) The collection of particle of claim 1 having at least three metals within the composition.
- 7. (Original) The collection of particles of claim 1 wherein the composition comprises Li<sub>x</sub>FePO<sub>4</sub>, 0.1≤x≤1.

- 8. (Original) The collection of particles of claim 1 wherein the composition comprises LiFe<sub>1-x</sub>Mn<sub>x</sub>PO<sub>4</sub>, 0≤x≤0.8.
- 9. (Original) The collection of particles of claim 1 wherein the composition comprises LiFe<sub>1-x</sub>Mn<sub>x</sub>PO<sub>4</sub>, 0.4≤x≤0.8.
- 10. (Original) The collection of particles of claim 1 wherein the composition comprises
  M<sub>x</sub>PO<sub>4</sub>, wherein M is a metal, x is a rational number and x≤4.
- 11. (Original) The collection of particles of claim 1 wherein the composition comprises Fe<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub>.
- 12. (Original) The collection of particles of claim 1 wherein the composition comprises FePO<sub>4</sub>.
- 13. (Original) The collection of particles of claim 1 having essentially no particle with an diameter greater than about 5 times the average particle size.

- (Original) The collection of particles of claim 1 having essentially no particle with 14. an diameter greater than about 3 times the average particle size.
- (Original) The collection of particles of claim 1 having a distribution of particle sizes 15. such that at least about 95 percent of the particles have a diameter greater than about 40 percent of the average diameter and less than about 160 percent of the average diameter.

- (Original) A battery comprising an cathode, the cathode comprising the collection of 16. particles of claim 1, the particles comprising lithium metal phosphate.
- (Original) The battery of claim 16 wherein the lithium metal phosphate comprises 17. LixFePO4.
- (Original) The battery of claim 16 wherein the lithium metal phosphate comprises 18. LiFe<sub>1-x</sub>Mn<sub>x</sub>PO<sub>4</sub>, where 0.6≤x≤0.8.
- (Original) The battery of claim 16 comprising an anode having lithium metal. 19.
- (Original) The battery of claim 16 comprising an anode having a lithium 20. intercalation compound.
- (Original) A collection of particles comprising a collection of amorphous particles, 21. the particles comprising a phosphate composition having an average particle size less than about 95 nm.

- (Canceled) 22-47.
- (New) The collection of particles of claim 21 having a plurality of metals in the 48. composition.
- (New) The collection of particle of claim 21 having at least three metals within the 49. composition.
- (New) The collection of particles of claim 21 wherein the composition comprises 50. lithium.
- (New) The collection of particles of claim 21 having essentially no particle with an 51. diameter greater than about 5 times the average particle size.
- (New) The collection of particles of claim 21 having essentially no particle with an 52. diameter greater than about 3 times the average particle size.
- (New) The collection of particles of claim 21 having a distribution of particle sizes 53. such that at least about 95 percent of the particles have a diameter greater than about 40 percent of the average diameter and less than about 160 percent of the average diameter.
- (New) The collection of particles of claim 21 wherein the phosphate composition 54. comprises AlPO<sub>4</sub> or Ca<sub>3</sub>(PO<sub>4</sub>)<sub>2</sub>.
